PROJECTS

IMTS Main Panel ⧉ | Next.js, Node.js, TailwindCss, Google auth

- **Implemented comprehensive SEO optimization** for IMTS Institute educational platform, resolving critical technical SEO issues (robots.txt, dynamic sitemaps, structured data) and enabling proper Google indexing—improving site discoverability and crawl efficiency across multiple content types (courses, universities, blogs).
- **Designed and deployed fine-grained role-based access control system** with dynamic permission management for dashboard sections, enabling flexible user authorization without backend changes—supports multiple user types (writers, managers, admins) with automatic route protection, session integration, and real-time permission updates.

Task Management System ⧉ | React.js, Express.js, Node.js, Tailwind CSS, MongoDB

- **Implemented** multi-dimensional filtering (status, priority, stage, creator, assignees) with dynamic sorting, pagination, and real-time search across task collections using React state management and Axios API integration.
- **Designed separate** workflows for individual and group tasks with dynamic approval tracking, progress calculations, and role-based UI rendering (admin/HOD dashboards) using TypeScript and conditional rendering.
